KINGDOM OF THE BLEEDING HEART
MINISTRY OF INTELLIGENCE
INTELLIGENCE ASSESSMENT

DOCUMENT NO.
BH-MOI-20261031-0740-CAR
DATE-TIME GROUP
310740Z OCT 26

FROM	Director of Intelligence, Ministry of Intelligence
TO	The Crown Council; Ministry of Attack
SUBJECT	**CARTHAGE: CAPABILITIES, INTENTIONS AND OUTLOOK**
DATE	Sat, 31 Oct 2026 07:40:10 UTC
BASIS	32 automated collections between 10/21/2026 and 10/31/2026; latest scan 07:40 UTC.

1. Summary

1.1 Carthage is a marginal actor, ranked 8th of 8 nations by overall strength and 8th by active membership. It holds 32 towns with 128 residents, of whom 45 were active in the last thirty days, and controls 874 chunks of territory with 15,802g held in its town banks. On the evidence of the archive it is losing strength: over the period under review its active membership has fallen by 27 and its territory has fallen by 257 chunks.

1.2 The Ministry assesses Carthage's posture toward Bleeding_Heart as hostile, because it is an enemy of ours and hostile to our ally Rome. The most likely development is that Carthage will lose towns or land over the next 7 days, which the Ministry judges almost certain. The risk that Carthage itself loses towns or territory in the next thirty days is assessed as moderate, with a score of 30 out of 100.

2. Key Judgments

2.1 The Ministry judges it almost certain (high confidence) that Carthage will lose towns or land over the next 7 days. Although no town is yet close to ruin, active membership has fallen by 27 and territory has fallen by 257 chunks over the period, which points to weakening cohesion.

2.2 The Ministry judges it likely (high confidence) that leadership of Carthage will change within 3 days unless R2_0 returns. R2_0 was last online 39 days ago; under the server's rules leadership passes to another member once the leader exceeds the inactivity limit.

2.3 The Ministry assesses with high confidence that Carthage's risk of losing towns or land in the next thirty days is moderate. 16 chunks of its territory can already be overclaimed, and 39 per cent of the members whose activity was checked have been online in the last month.

3. Background and Recent History

3.1 Active membership stood at 80 when the archive first recorded Carthage on Oct 21 and now stands at 45, a decline of 35 (44 per cent). Over the same period its territory went from 1,150 to 874 chunks (down 24 per cent), the number of its towns went from 40 to 32 (down 20 per cent) and its residents went from 200 to 128 (down 36 per cent).

3.2 Over the past thirty days the archive recorded no new towns founded within Carthage and eight towns lost to ruin or deletion. One town joined from other nations while no towns left. Its government made one diplomatic change in the same period, most recently when it allied with Sparta on Oct 31.

4. Leadership and Internal Cohesion

4.1 Carthage is led by R2_0, who was last online 39 days ago. At this rate the leader will reach the inactivity limit around Nov 3, after which leadership would pass to another member. A single login before then would reset the clock.

4.2 Of the members whose activity was checked, 39 per cent have been online in the last thirty days, against a server median of 37 per cent; 32 were online in the last week alone. Every town checked has at least one active resident. Taken together, the Ministry assesses Carthage's internal cohesion as typical for the server.

5. Territory and Disposition

5.1 Carthage's towns are centred near X -4,082, Z 4, and lie on average 2,197 blocks from that point, which makes it a moderately dispersed nation. Its largest holdings are Town178 (42 chunks, 2 of 4 residents active), Town298 (42 chunks, 2 of 4 residents active) and Town146 (40 chunks, 3 of 4 residents active).

5.2 The centre of Carthage lies about 7,217 blocks east of Bleeding_Heart. None of its towns lies within 1,500 blocks of Bleeding_Heart's; the closest pair are Town130 and Town144, 5,691 blocks apart. The gap has been widening by about 126 blocks a day.

5.3 Over the past week the nation's territory has been shifting to the west, judging by the drift of its centre; the nearest nation in that direction is Rome. Two towns currently claim more land than their residents support, leaving 16 chunks open to overclaim. A further 12 towns will exceed their claim limit within 14 days as inactive residents stop counting.

6. Economy

6.1 Carthage's town banks hold 14,802g in total, and the national bank a further 1,000g, which ranks 7th of 8. That is 494g per town against a server median of 490g. Wealth is concentrated in Town170 (890g), Town194 (878g) and Town218 (866g). One town holds almost nothing and would struggle to pay daily upkeep. Total gold stood at 15,000g when the archive first recorded Carthage on Oct 21 and now stands at 15,802g, an increase of 802g (5 per cent). It reached a high of 18,234g on Oct 31.

7. Foreign Relations

7.1 Carthage is formally allied with three nations: Persia (strength 25, 50 active members, wary toward Bleeding_Heart), Troy (strength 21, 48 active members, wary toward Bleeding_Heart) and Sparta (strength 56, 51 active members, neutral toward Bleeding_Heart). Together these allies command 149 active members.

7.2 It has declared two enemies: Bleeding_Heart (strength 67, 51 active members) and Rome (strength 89, 56 active members, ally toward Bleeding_Heart).

7.3 From Bleeding_Heart's position, the significant facts are that Carthage is an enemy of ours and hostile to our ally Rome. Measured by active members, Carthage and its allies field 194 against 162 for

Bleeding_Heart and its allies.

7.4 In the past fortnight Carthage's diplomatic position has moved: on Oct 31 it allied with Sparta.

8. Military Potential

8.1 In Towny warfare, active manpower determines how quickly a nation can claim, defend and contest land, and treasury determines whether it can sustain those claims. Carthage ranks 8th of 8 by active members and 7th by gold. Its active membership is 88 per cent of Bleeding_Heart's. It lacks the manpower to threaten a well-organised neighbour on its own. Its overall strength score is 18 out of 100.

9. Vulnerabilities

9.1 No town of Carthage is forecast to fall to ruin within seven days.

9.2 16 chunks can be taken now by overclaim from Town178 (8) and Town298 (8). Their homeblocks are protected, but the surplus can be claimed by any town over thirty days old that borders them.

9.3 Low activity is the nation's most serious structural weakness: fewer than half its members are active, and every inactive resident reduces the land its towns may hold.

10. Outlook and Scenarios

10.1 The most likely scenario over the coming week is that Carthage will lose towns or land over the next 7 days (almost certain, high confidence). Although no town is yet close to ruin, active membership has fallen by 27 and territory has fallen by 257 chunks over the period, which points to weakening cohesion. The Ministry would regard further towns ruining or residents leaving as confirmation.

10.2 An alternative development is that leadership of Carthage will change within 3 days unless R2_0 returns (likely).

10.3 If current trends hold, Carthage will have about 25 active members and 781 chunks in seven days, and would be left with almost no active members within thirty. Thirty-day projections assume the past week's rate continues and should be treated with caution.

11. Implications for the Kingdom

11.1 Carthage should be treated as an adversary. It does not border us directly, which limits its immediate impact. Its current weaknesses also present opportunities: surplus land can be overclaimed.

12. Recommendations

12.1 The Ministry of Attack should prepare overclaim operations against Town178 and Town298, which together offer 16 chunks; operations require a Kingdom town over thirty days old with three adjacent claims along the border.

13. Intelligence Gaps and Confidence

13.1 This assessment draws on 32 automated collections between 10/21/2026 and 10/31/2026; latest scan 07:40 UTC. The activity of 12 residents was not checked in the latest collection, so activity figures are a lower bound. Confidence in each judgment reflects the depth of the archive for Carthage: it is currently high. Estimative language follows the Kingdom standard: almost certain (95% or more), highly likely (80–95%), likely (55–80%), roughly even chance (45–55%), unlikely (20–45%), highly unlikely (5–20%), remote (under 5%). Confidence reflects the depth of the archive for each subject, not the importance of the judgment.

Annexes: Annex A. Statistical Summary; Annex B. Trends; Annex C. Register of Towns.

Distribution: The Crown Council; Ministry of Attack (War Room). Not for release outside the Kingdom.

ANNEX A

Statistical Summary

Measure	Now	24 hours	7 days	30 days	Trend
Active members (30 days)	45	-12	-27	—	Falling
Active members (7 days)	32	+4	-4	—	Falling
Residents	128	-72	-72	—	Falling
Towns	32	-8	-8	—	Flat
Chunks	874	-220	-257	—	Falling
Gold	16k	+802	+802	—	Rising
Towns forecast to fall (3 days)	0	0	0	—	Flat
Chunks overclaimable	16	+16	+16	—	Rising

Changes are measured against the nearest archived collection at or before each interval. A dash means the archive does not yet reach back that far.
