KINGDOM OF THE BLEEDING HEART

MINISTRY OF INTELLIGENCE

INTELLIGENCE ASSESSMENT

DOCUMENT NO.
BH-MOI-20261031-0742-CAR

DATE-TIME GROUP
310742Z OCT 26

FROM	Director of Intelligence, Ministry of Intelligence
TO	The Crown Council; Ministry of Attack
SUBJECT	**CARTHAGE: CAPABILITIES, INTENTIONS AND OUTLOOK**
DATE	Sat, 31 Oct 2026 07:42:24 UTC
BASIS	2 automated collections between 10/31/2026 and 10/31/2026; latest scan 07:42 UTC.

1. Summary

1.1 Carthage is a marginal actor, ranked 4th of 8 nations by overall strength and 3rd by active membership. It holds 50 towns with 100 residents, of whom 0 were active in the last thirty days, and controls 1,000 chunks of territory with 23,500g held in its town banks. On the evidence of the archive it is broadly stable: over the period under review its active membership has held steady and its territory has held steady.

1.2 The Ministry assesses Carthage's posture toward Bleeding_Heart as hostile, because it is an enemy of ours. The most likely development is that Carthage will lose towns or land over the next 7 days, which the Ministry judges almost certain. The risk that Carthage itself loses towns or territory in the next thirty days is assessed as high, with a score of 54 out of 100.

2. Key Judgments

2.1 The Ministry judges it almost certain (low confidence) that Carthage will lose towns or land over the next 7 days. 40 towns will pass the inactivity limit within seven days unless a resident logs in, and over the period active membership has held steady.

2.2 The Ministry judges it likely (high confidence) that leadership of Carthage will change within 2 days unless R2_0 returns. R2_0 was last online 40 days ago; under the server's rules leadership passes to another member once the leader exceeds the inactivity limit.

2.3 The Ministry assesses with low confidence that Carthage's risk of losing towns or land in the next thirty days is high. 20 towns could fall within three days, and 0 per cent of the members whose activity was checked have been online in the last month.

3. Background and Recent History

3.1 Active membership stood at 0 when the archive first recorded Carthage on Oct 31 and now stands at 0, unchanged over the period. Over the same period its territory held at 1,000 chunks, the number of its towns held at 50 and its residents held at 100.

3.2 No significant changes to Carthage's towns or diplomacy have been recorded in the past thirty days.

4. Leadership and Internal Cohesion

4.1 Carthage is led by R2_0, who was last online 40 days ago. At this rate the leader will reach the inactivity limit around Nov 2, after which leadership would pass to another member. A single login before then would reset the clock. The capital, Town2, is a town of 20 chunks with 1 of its 2 residents active.

4.2 Of the members whose activity was checked, 0 per cent have been online in the last thirty days, against a server median of 0 per cent; 0 were online in the last week alone. 20 towns have no active residents at all, including Town18, Town34, Town58 and Town74. Taken together, the Ministry assesses Carthage's internal cohesion as typical for the server.

5. Territory and Disposition

5.1 Carthage's towns are centred near X -4,302, Z -486, and lie on average 2,368 blocks from that point, which makes it a moderately dispersed nation. Its largest holdings are Town2 (20 chunks, 1 of 2 residents active), Town10 (20 chunks, 2 of 2 residents active) and Town18 (20 chunks, 0 of 2 residents active). The capital sits at X -4,806, Z -4,394.

5.2 The centre of Carthage lies about 6,998 blocks east of Bleeding_Heart. None of its towns lies within 1,500 blocks of Bleeding_Heart's; the closest pair are Town58 and Town72, 5,691 blocks apart.

5.3 The archive shows no consistent direction of expansion over the past week. None of its towns currently claims more land than its residents support. A further 20 towns will exceed their claim limit within 14 days as inactive residents stop counting.

6. Economy

6.1 Carthage's town banks hold 22,500g in total, and the national bank a further 1,000g, which ranks 4th of 8. That is 470g per town against a server median of 470g. Wealth is concentrated in Town170 (890g), Town194 (878g) and Town218 (866g). One town holds almost nothing and would struggle to pay daily upkeep. Total gold stood at 23,500g when the archive first recorded Carthage on Oct 31 and now stands at 23,500g, unchanged over the period.

7. Foreign Relations

7.1 Carthage has no formal allies, which leaves it without guaranteed support if it is attacked.

7.2 It has declared one enemy: Bleeding_Heart (strength 60, 2 active members).

7.3 From Bleeding_Heart's position, the significant facts are that Carthage is an enemy of ours. Measured by active members, Carthage and its allies field 0 against 2 for Bleeding_Heart and its allies.

7.4 Its diplomatic position has been static for at least a fortnight.

8. Movements and Reconnaissance

8.1 During two hours of movement collection over the past week, members of Carthage were observed on two visits into Bleeding_Heart's territory, made by one player; the Ministry assesses all of them as

probable reconnaissance. Reconnaissance is judged from how a visitor behaves: time spent along the edge of the claims rather than at the town spawn, a wandering path, several towns of the same nation in one day, and return visits. The towns visited most were Town8 (one visit) and Town16 (one visit). The most frequent visitor was R2_0 (two visits).

8.2 The Forecast Lab, whose incursion model has been checked against 1 real outcomes, judges it highly likely (93%) that this activity is followed within seven days by a hostile move against Bleeding_Heart: a declaration of enmity, a broken alliance, a town changing sides, or land lost in one of the towns visited.

8.3 More broadly, Carthage's members made two visits to other nations' towns this week, most often to Bleeding_Heart (2).

9. Military Potential

9.1 In Towny warfare, active manpower determines how quickly a nation can claim, defend and contest land, and treasury determines whether it can sustain those claims. Carthage ranks 3rd of 8 by active members and 4th by gold. Its active membership is 0 per cent of Bleeding_Heart's. It lacks the manpower to threaten a well-organised neighbour on its own. Its overall strength score is 11 out of 100.

10. Vulnerabilities

10.1 40 towns will pass the inactivity limit within seven days unless one of their residents logs in: Town18 (mayor R18_0, around Oct 31), Town58 (mayor R58_0, around Oct 31), Town98 (mayor R98_0, around Oct 31), Town138 (mayor R138_0, around Oct 31), Town178 (mayor R178_0, around Oct 31), Town218 (mayor R218_0, around Oct 31), Town258 (mayor R258_0, around Oct 31) and Town298 (mayor R298_0, around Oct 31), and 32 others. Once ruined, their contents can be taken by anyone.

10.2 Low activity is the nation's most serious structural weakness: fewer than half its members are active, and every inactive resident reduces the land its towns may hold.

11. Outlook and Scenarios

11.1 The most likely scenario over the coming week is that Carthage will lose towns or land over the next 7 days (almost certain, low confidence). 40 towns will pass the inactivity limit within seven days unless a resident logs in, and over the period active membership has held steady. The Ministry would regard further towns ruining or residents leaving as confirmation.

11.2 An alternative development is that leadership of Carthage will change within 2 days unless R2_0 returns (likely).

11.3 The archive does not yet hold a week of history on Carthage, so numerical projections are not offered.

12. Implications for the Kingdom

12.1 Carthage should be treated as an adversary. It does not border us directly, which limits its immediate impact. Its current weaknesses also present opportunities: towns about to ruin can be raided.

13. Recommendations

13.1 Raiding parties should be positioned for Town18 on Oct 31, Town58 on Oct 31 and Town98 on Oct 31, using the nearest funded public warp listed in the Ruin Hunter.

14. Intelligence Gaps and Confidence

14.1 This assessment draws on 2 automated collections between 10/31/2026 and 10/31/2026; latest scan 07:42 UTC. The activity of every resident was checked. Confidence in each judgment reflects the depth of the archive for Carthage: it is currently low. Movement intelligence rests on two hours of live-map collection this week, and players who hide from the map are not seen. Estimative language follows the Kingdom standard: almost certain (95% or more), highly likely (80–95%), likely (55–80%), roughly even chance (45–55%), unlikely (20–45%), highly unlikely (5–20%), remote (under 5%). Confidence reflects the depth of the archive for each subject, not the importance of the judgment.

Director of Intelligence
Ministry of Intelligence, Kingdom of The Bleeding Heart

Annexes: Annex A. Statistical Summary; Annex B. Trends; Annex C. Register of Towns; Annex D. Recorded Visits by Carthage into Bleeding_Heart.

Distribution: The Crown Council; Ministry of Attack (War Room). Not for release outside the Kingdom.

ANNEX A

Statistical Summary

Measure	Now	24 hours	7 days	30 days	Trend
Active members (30 days)	0	—	—	—	Insufficient data
Active members (7 days)	0	—	—	—	Insufficient data
Residents	100	—	—	—	Insufficient data
Towns	50	—	—	—	Insufficient data
Chunks	1,000	—	—	—	Insufficient data
Gold	24k	—	—	—	Insufficient data
Towns forecast to fall (3 days)	20	—	—	—	Insufficient data
Chunks overclaimable	0	—	—	—	Insufficient data

Changes are measured against the nearest archived collection at or before each interval. A dash means the archive does not yet reach back that far.

ANNEX D

Recorded Visits by Carthage into Bleeding_Heart

When	Player	Town	Stay	Border	Spawn	Assessment
Oct 31 04:45	R2_0	Town16	2m	100%	14%	Confirmed reconnaissance
Oct 31 04:42	R2_0	Town8	3m	100%	20%	Confirmed reconnaissance

Border and Spawn give the share of the visit spent on claims at the edge of the town and within 24 blocks of its spawn. Times are UTC.
